DETAILED ACTION

Reasons For Allowance

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance: Webb (The WARP: Wideband Advanced Recorder Processor for the New Millennium Program) teaches processor have the capability to perform automated retransmission of data if frames are missed by the receiver at the ground station (See Page 478, Lines 8-13). However, prior art of record fail to teach or render obvious, alone or in combination, a system for data monitoring and recovery (DMR), the system comprising: one or more first DMR agents, each first DMR agent residing at one of one or more receptors that are each operable to receive first data units from one or more remote units, the first DMR agent being operable to generate first tracking reports of the first data units received at the receptor and communicate the first tracking reports to a DMR manager; one or more second DMR agents, each second DMR agent residing at one of one or more centrals that are each operable to receive first data units from one or more receptors and extract second data units from the first data units for communication to one or more interface data processors (IDPs), the second DMR agent being operable to: generate second tracking reports of the first data units received at the central and communicate the second tracking reports to the DMR manager; and generate delivery reports of the second data units extracted at the central and communicate the delivery reports to the DMR manager, the delivery reports indicating missing second data units

Art Unit: 4177

that should have been received at the central, but were not; and the DMR manager, operable to: using the delivery reports, identify the missing second data units; using one or more of the tracking reports: map the missing second data units to one or more first data units; and determine a best source for retransmission of the first data units mapped to the missing second data units; generate a retransmit request for the first data units mapped to the missing second data units; and communicate the retransmit request to the best source in combination with all other limitation as recited in independent claim 1.

Furthermore, the same consideration as made above also apply to independent claims 11, 20 and 29 since these claims includes essentially the same feature combination as claim 1 in terms of method, logic and system claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
